

Directions to Bolton Engineering from public transportation (MBTA)

Take the MBTA subway Orange line to Oak Grove stop (the last stop northbound).

At the top of the escalator, go through the turnstiles, turn right, and go down the stairs to the street.

Turn right (north) and walk about ¼ mile up Washington Street. When you pass Marty’s Furniture (which has a large copper beech tree out front), you’re almost there. The last large brick building on the right, at the corner of Stone Place, is 72 Stone Place.

Bolton Engineering is on the third floor of the building. Go in the front door (on the Pleasant Street side), go up the stairs, and Bolton Engineering is the first door on the right. **Phone number: 781-662-1670**

Alternatively, there is a commuter rail stop (Wyoming Hill), about ½ mile north of Bolton Engineering. From that train stop, walk south on Pleasant St. about ½ mile until you see a large brick mill building on the left.
